

**Giti Comfort  
225V1**

**Specially Designed  
for Electric Vehicle**

## GITICOMFORT 225V1

### *AdvanzTech*

*A new generation of green energy-saving tyre, developed to meet the needs of new energy vehicles (NEVs) with large torque and heavier body weight.*

*Using strict OEM requirements as the standard, to maximize the energy-saving advantages of tyres and vehicles.*

## FEATURES & BENEFITS

### Strong Grip - Stable Ride

Blended with synthetic rubber with high styrene content and high moisture - resistant silica - Provides excellent wet grip

Strong tread pattern design and gradual depth structure of the main groove - Greatly improves overall tyre shoulder rigidity, providing a more convenient driving response, stronger grip and more sensitive steering

### Less Noise - More Comfort

Four - band pattern block variable pitch design, reducing the sharpness of tyres hitting the road surface - Reduced instantaneous impact noise

### Minimize Wear and Tear for More Energy Savings

Lighter and stronger carcass and cap materials for a smoother ride - Reduced weight and energy consumption

A new low-rolling resistance tread compound with multi-end modified solution polymerized styrene butadiene rubber (SSBR) - Reduction of tread heat-generation. Reduced energy consumption

Equipped with second-generation tyre RR prediction technology - Lowered thickness of tread rubber and reduced energy loss
