

GitiControl P10

An ultra-high performance summer tyre, the GitiControl P10 provides comfort and silent driving - bringing you and your family a safe and fun ride.

FEATURES & BENEFITS

Comfortable and Quiet

- **Sound - Muting Water Wave Pattern** - Based on the soft bionic structure design of water flow, the flowing lines can break the air flow in the main groove and optimize the tyre noise.
- **Optimal Design of Variable Pitch and Dislocation** - The design of three-band variable pitch and dislocation effectively optimizes the inside noise of a driving car, also improving driving comfort.
- **Pipe Noise Optimization Technology** - The optimized transverse grooves of the crown lead to the longitudinal grooves, effectively reducing the pipe resonance and unwanted sound.

Precise Control and Braking Safety

- **3D Design of Outer Perimeter Groove** - The outer main groove adopts 3D design, which accurately optimizes the stiffness of blocks and improves the control response for turning.
- **Optimized Design of Transverse Groove's Cutting Angle** - Achieves effective boundary curling inhibition effect, making the tyre contact more uniform, while decreasing braking distance and to improving driving safety.
- **Groove Pre-Deformation Technology** - A new groove pre-deformation design facilitates drainage and reduces the tread creep deformation to achieve precise control.

The water film is "sucked" into the transverse groove and then quickly discharged into the main groove. This process accelerates drainage, while ensuring wet grip performance and abrasion throughout the life cycle.

- **Widened and Optimized Positioning of Longitudinal Groove** - The optimized longitudinal groove ratio combines a widened groove in the middle, to obtain excellent drainage performance on wet roads.

Rim size:
 17 - 22"

Aspect Ratio:
 35 - 60

Max. speed:
 300km/h

EQUAL FORCE CASING DESIGN
 Improves overall handling, lowers irregular wear, and increases tyre life.

advanztech
 Silent Tyre Technology

Uses advanced computer calculation methods to get the most optimized pattern design, minimizing driving noise.

► The high-tension cap ply brings high-speed driving stability and excellent uniformity, while reducing high-speed driving noise

► A durable and high-strength wide belt system improves handling stability and ensures durability and puncture resistance

► The carcass cord with high density and low shrinkage provides excellent dimensional stability at high speeds, realizing cushioning and vibration absorbing functions, and achieving top level ride comfort

► Bead wire ensures the assembly safety of tyre and rim

► Optimized curvature of upper and lower circular arcs of rim protector helps to eliminate cracking

► Large rim protector tape effectively protects the rim from scratches and damage
