

Experience the Performance

CHAMPIRO VP 1

Features and Benefits

- Four deep, wide circumferential tread grooves. Provide excellent water channeling and anti-hydroplaning performance
- Stable shoulder block with lateral groove. Reduces tread block movement and ensures quick steering response and cornering grip
- Continuous circumferential center rib. Improves straight line stability and uniform tread life
- Optimized tread block design with integral lateral grooves and sipes. Provides better wet handling and reduces road noise
- Advanced tread compound. Generates excellent grip in wet and dry conditions, and delivers reduced rolling resistance for better fuel efficiency
